Fun in the Sun

As summer gets into full swing, the weather warms up, the sun shines and we spend more time outdoors. Whether it be to work or play, being in the wonderful weather can also cause complications.

While spending some time in the sun is healthy, excessive exposure can be harmful. There are many dangers associated with the heat and sunshine. Knowing what they are can help you to enjoy your time in the sun and keep you, your co-workers, and your friends and family safe.

Sunburns

One of the most apparent problems associated with a lot of time in the sun is sunburns. A sunburn is a form of radiation burn caused by prolonged exposure to the ultraviolet (UV) light of the sun. It causes the skin to redden and in some cases, can cause blisters. In some extreme cases, the burns can be debilitating and may require hospitalization.

To prevent sunburns only takes a little planning. First, wear appropriate clothing. In some cases, wearing long-sleeve shirts and long pants will help protect our skin from radiation.

Another level of protection against harmful UV rays is sun block or sunscreen. Make sure you research a little to find the one that works the best for you.

One of the biggest and most recurring preventative measures is to drink plenty of water. Soda and sugary drinks do not replenish the fluids your body needs and can give you a false sense of fluid replenishment.

Dehydration

Spending a lot of time in the sun and warm weather can evaporate a lot of fluids from your body especially if you are active and sweating. Fluid replacement is very important. Water is the fluid of choice but some electrolyte drinks may help also. Make sure

you stay away from soda and very sugary drinks.

Heat Stroke

Heat stroke is considered a medical emergency and requires medical treatment. It can be deadly if not treated immediately. Most mild forms of heat-related illness (dehydration, heat exhaustion, etc.) can lead to heat stroke.

Heat stroke is an elevation in the internal body temperature above 105F. It can cause damage to the brain and other internal organs.

Symptoms include:

- ◆ Headaches
- ◆ Dizziness or light-headedness
- ◆ Lack of sweating despite the heat
- ◆ Red, hot, and dry skin
- ◆ Muscle weakness or cramps
- ◆ Nausea and vomiting
- ◆ Rapid heartbeat, can be strong or weak
- ◆ Rapid, shallow breathing
- ◆ Behavior changes (confusion, disorientation, staggering)
- ◆ Seizures
- ◆ Unconsciousness

If you suspect heat stroke, call 9-1-1 and move the patient to a cool, shady area or preferably an air-conditioned area. If you have ice-packs, apply those to the patient's armpits, neck, back or groin area. Do NOT give ice cold water to drink as this may cause thermal shock. When you call 9-1-1, ask them for further instructions if needed.

While there are other heat-related illnesses and injuries, this covers a couple of the more common illnesses. Please be aware of the possibilities and take precautions to insure you have a safe work environment or recreational activity.

Solar Panel Increase

This letter was sent to us from our solar panel manufacturer. We have modified it for distribution to you:

Dear friends,

On Tuesday, June 3rd 2014, The United States Department of Commerce successfully imposed an increased duties of approximately 21.89 percent to importers of solar panels, asserting that foreign manufacturers had benefited from unfair labor subsidies.

The decision, in a long-simmering trade dispute, addresses one of the main charges in a petition brought by the manufacturer Solar-World Industries America. While it is preliminary, the ruling means that the United States will begin collecting the tariffs in advance of the final decision, expected later this year.

What does this mean to you as a customer? Since you are not the importer on file, you will not be directly taxed for your solar panels. There will, however, be an increase of about 15 percent across the board on all solar modules in the next coming months.

Our goal at Delco Western, is to remain competitive. So, we will continue to offer you great pricing and unprecedented service in the coming years!

Thank you for your continued support.

Did You Know?

In Utah, we celebrate Pioneer Days with fireworks, rodeos, and the Days of '47 parade on July 24th. Do you know how it all started?

The Mormon church had been persecuted since its inception in the 1820's. Having been driven out of every place they settled, it was determined they would travel out west to escape the persecution.

In 1847, the Mormon pioneers traveled across the plains and the Rockies until on July 24th, they entered the Salt Lake Valley and Brigham Young declared "This is the place." His actual phrase was "This is the right place. Drive on" but that is another story.

As you celebrate the 24th holiday, give a nod to the historical figures that started our great state.

Visiting/Delivery Schedule

7/10-11—So. Utah (Richfield, Hanksville, Moab, Blanding) - Darren

7/18—North/Logan - Rob

7/22-23—So. Utah (Panguitch, Cannonville, Cedar City, Enterprise, St. George) - Darren

7/25—Uintah Basin - Rob

8/5-6—So. Utah (Richfield, Hanksville, Moab, Blanding) - Darren

8/20—Logan - Rob

8/21-22—So. Utah (Panguitch, Cannonville, Cedar City, Enterprise, St. George) - Darren

8/29—Uintah Basin - Rob

2559 South 1935 West
West Valley City, Utah 84119

Product Spotlight—E-One Sentry Advisor

*Monitor
and protect
your sewer
system with
E/One Sentry
Advisor*

E-One Sentry Advisor offers a new level of sewer system monitoring and protection - and can predict service needs.

E-One Sentry Advisor monitors pump performance and records every start, run time duration and stop of each grinder pump on the system. Alarm conditions can be sent automatically to service personnel.

The modem in the alarm panel transmits pump run and alarm data. The web interface can be configured to send alarm notices via SMS text, phone or e-mail to multiple contacts. Data is stored online and can be used to generate system performance reports and help identify pending service needs.

The Advisor can be set up for an individual homeowner to view their own reports or for a property manager to review several properties.

Contact Delco Western for additional information.
